1. Using genetic engineering, microorganisms can be modified to remove any contaminant from the soil and water.
2. Bioremediation is environment friendly, economical and quickest technique to clear up pollution.

Choose the correct combination using the codes given below:

(a) 1 only
(b) 2 only
(c) Both 1 and 2
(d) Neither 1 nor 2

51. Which of the following are ill-effects of plastic pollution?
    1. Inhibiting soil microbe activity
    2. Carcinogenic effects
    3. Release of Persistent Organic Pollutants
    4. Reducing underground water recharge Choose the correct combination using the codes given below:

    (a) 1 and 2 only
    (b) 1, 2 and 3 only
    (c) 1, 2, 3 and 4
    (d) 1 and 3 only

52. Which of the following international conventions are correctly matched with target pollut-ant/hazardous chemicals group?
    1. Basel Convention: Safe disposal of Radioactive water
    2. Rotterdam Convention: Controlling transboundary movement of hazardous chemicals Pesticides
    3. Stockholm Convention: Eliminating Persistent organic Pollutants

    Answer using the codes given below:

    (a) 1 and 2 only
    (b) 2 and 3 only
    (c) 1 and 3 only
    (d) 1, 2 and 3

53. Consider the following statements:
    1. Species diversity is a measure of the diversity within an ecological community that incorporates both species richness and the evenness of species.
    2. If value of species diversity is ‘one’ represents infinite diversity, and ‘zero’ represents only one species present.
