Which of the above statements are correct?

(a) 1 only
(b) 2 only
(c) Both 1 and 2
(d) Neither 1 nor 2

54. Consider the following statements:
    1. Species diversity is a measure of the diversity within an ecological community that incorporates both species richness and the evenness of species.
    2. If value of species diversity is ‘one’ represents infinite diversity, and ‘zero’ represents only one species present.

    Which of the above statements are correct? Choose right combination from the options given below:

    (a) 1 only
    (b) 2 only
    (c) Both 1 and 2
    (d) Neither 1 nor 2

55. Consider the following statements:
    1. Species that differ from one another in their genetic makeup do not interbreed in nature.
    2. Genetic diversity is the total number of genetic characteristics in the genetic makeup of a species.

    Which of the above statements are correct?

    (a) 1 only
    (b) 2 only
    (c) Both 1 and 2
    (d) Neither 1 nor 2

56. Consider the following statements:
    1. Keystone species is a species whose addition to or loss from an ecosystem leads to major changes in the occurrence of at least one other species.
    2. Keystone species of an ecosystem are always the group apex predators.

    Which of the above statements are correct?

    (a) 1 only
    (b) 2 only
    (c) Both 1 and 2
