2. The purpose of TEEB is to promote analysis of global economic benefit of biological diversity, the costs of the loss of biodiversity and the failure to take protective measures versus the costs of effective conservation.

Which of the above statements are correct?

(a) 1 only
(b) 2 only
(c) Both 1 and 2
(d) Neither 1 nor 2

DIFFICULTY LEVEL: MEDIUM

51. Consider the following statements regarding plant growth:
    1. Plants that are grown in predominantly blue light tends to be smaller with shorter stems and thicker leaves than its counterpart grown in natural light.
    2. Plants that are grown in predominantly ultraviolet and violet light tends to become dwarfs.

    Which of the statements are correct? Choose the correct option using the codes given below:

    (a) 1 only
    (b) 2 only
    (c) Both 1 and 2
    (d) Neither 1 nor 2

52. Which of the following processes might involved in diversity of the three-spined stickleback, a marine fish which established new freshwater colonies in isolated lakes and streams after the last glacial period?
    1. Adaptation
    2. Speciation
    3. Adaptive speciation
    4. Evolution

    Choose the correct combination using the code given below:

    (a) 1, 2 and 3 only
    (b) 2, 3 and 4 only
    (c) 1, 2, 3 and 4
