(d) 1, 3 and 4 only

53. Which of the following adaptations is correctly matched with corresponding description?
    1. Girraffe's neck growing longer with higher growth of trees over time: Physiological Adaptation
    2. Animals temporarily migrating to perennial water bodies during summer: Behavioural
    3. Ability of polar bear to reduce metabolic rate during winter: Morphological

    Choose correct combination using codes given below:
    (a) 1 and 2 only
    (b) 2 and 3 only
    (c) 3 only
    (d) 1 only

54. Consider the following statements regarding ecotone:
    1. Ecotone, being a transitional ecosystem, should always be narrowly spread.
    2. Since it has conditions intermediate to the adjacent ecosystems. Hence it is a zone of tension.

    Which of the statements are correct? Choose the correct option using the codes below:
    (a) 1 only
    (b) 2 only
    (c) Both 1 and 2
    (d) Neither 1 nor 2

55. Suppose Wakanda is a newly emerged island in tropical zone due to tectonic activity. Wakanda is of size of Australia, with uniform precipitation and insolation across its area. If Autogenic Ecological succession is to be happened, and primary succession is uniform across the island, which of the following area of Wakanda is more likely to reach ecological climax first.
    (a) Interior part of the Wakanda
    (b) Coastal Zone of Wakanda
    (c) Entire Wakanda would reach ecological climax at the same time as precipitation, insolation and primary succession are uniform
    (d) Cannot be determined
