# World Physical Geography: Geomorphology (Landforms)

## DIFFICULTY LEVEL: EASY

1. Consider the following statements:
   1. Earth's gravitational force (g) is same at dif¬ferent points on Earth's surface irrespective of longitude and latitude if the altitude is same.
   2. Geo-dynamo Theory explains the origin of Earth's magnetic field.

   Which of the statements above is/are true?
   (a) 1 only
   (b) 2 only
   (c) Both 1 and 2
   (d) Neither 1 nor 2
2. Which of the following refers to Diastrophism?
   (a) The processes involving mountain building through severe folding and affecting long and narrow belts of the earth's crust.
   (b) The processes involving uplift or warping of large parts of the earth's crust.
   (c) Both (a) and (b)
   (d) None of the above
3. "..... occurs when the surplus accumulated stress in rocks in the earth's interior is relieved through the weak zones over the earth's sur¬face in form of kinetic energy of wave motion causing vibrations (at times devastating) on the earth's surface."
   The aforementioned paragraph refers to a geo- morphic process is widely known as
