toward achieving the purpose of the Agreement and its long-term goals. It takes place every five years.
- The outcome of the global stocktake shall inform Parties in updating and enhancing, in a nationally determined manner, their actions and support in accordance with the relevant provisions of the Agreement, as well as in enhancing international cooperation for climate action.

29. Nandhaur Wildlife Sanctuary is a wildlife sanctuary in Kumaon region of Uttarakhand. The sanctuary is part of the Terai Arc Landscape (TAL), a forest zone that stretches from Uttarakhand in India and extends into Nepal. The Terai Arc Landscape (TAL) extends from River Yamuna in India in the west to River Bagmati in Nepal in east.

30.
- SLCPs have relatively short lifetime in the atmosphere - a few days to a few decades.
- Though short-lived, their potential to warm the atmosphere can be many times greater than CO2.
- SLCPs are responsible for up to 45% of current global warming, only next to CO2.
- SLCPs include black carbon, methane, tropospheric ozone, and hydrofluorocarbons.

Difficulty Level: Medium

31. Difference between Habitat and Environment
- A habitat always has life in it, whereas the environment does not necessarily have life in it.
- All habitats are environments, but all environments are not habitats.
- A habitat is always a preference of one species.
- An environment could be a preference of many species that could eventually become many habitats.
- Usually, the environment governs the properties of a habitat, but not vice versa.

32. The biosphere is the biological component (supporting life) of the earth which includes the lithosphere, hydrosphere and
