- REDD+: Reducing emissions from deforestation and forest degradation and the role of conservation, sustainable management of forests and enhancement of forest carbon stocks in developing countries (REDD+).

93. Framework for Energy Efficiency Economic Development (FEEED) is for promoting energy efficiency initiatives by hedging against investment risks.
    - BEE institutionalised two types of funds in order to protect the confidence of banks and investors in energy efficiency projects and to avoid the stalling of projects due to lack of funds.
    - **Partial Risk Guarantee Fund for Energy Efficiency (PRGFEE):** The fund guarantees a risk cover for banks and investors for up to 50% loan amount or INR 10 crore per project, whichever is less.
    - **Venture Capital Fund for Energy Efficiency (VCFEE):** This fund is intended towards promoting equity financing (stock, share) in the energy efficiency sector and thus reducing the impact of non-availability of debt financing (bond, loan) to small size companies and projects. The equity support is equivalent to INR 2 crore or 15% of total equity whichever is less.
94. **National Water Mission (NWM) Mission:**
    - Objective is to ensure integrated water resource management helping to conserve water, minimize wastage and ensure more equitable distribution both across and within states.

    The Mission, in line with National Water Policy, aims to
    - increase water use efficiency by 20%.
    - ensure that a considerable share of the water needs of urban areas are met through recycling.
    - ensure that the water requirements of coastal cities are met through modern desalination technologies.
    - ensure basin level management strategies by working with states to deal with variability in rainfall.

    The Mission aims to achieve its objectives through:
    - Increasing efficiency through regulatory mechanisms (differential entitlements and pricing).
    - Enhanced storage both above and below ground, rainwater harvesting.
