and Tuya Muyun. China and India have their own deposits. Chinese uranium resources are thought to be in northern Xinjiang and southern Hunan provinces.

46. The Trucial States consisted of Abu Dhabi, Dubai, Sharjah, Ras al-Khaimah, Umm al-Qaiwain, Ajman and Fujairah, and from 1931, also Bahrain. The states had semi-independence, leaving military defense and foreign politics to the Great Britain.
47. There are six countries-Saudi Arabia, Yemen, Egypt, Sudan, Eritrea, and Djibouti bordering the Red Sea.
48. These landlocked countries are Uzbekistan, Armenia, Turkmenistan, Kyrgyzstan, Afghanistan, Tajikistan, Laos, Mongolia, Kazakhstan, Nepal, Bhutan, and Azerbaijan.
49.
    1. The Taklamakan Desert is located in the Xinjiang Uyghur Autonomous Region of China. It is surrounded by mountains to the north, south, and west and the Gobi Desert to the east.
    2. The Karakum Desert is located in Central Asia where it covers nearly 70% of the total area of Turkmenistan. The desert region is extremely sparsely populated. The desert is rich in oil and natural gas deposits. A chief attraction here is the Darvaza gas crater or the “Door to Hell”, a continuously burning crater set on fire intentionally by geologists to check the spread of methane gas.
    3. The Registan Desert is located in southwestern Afghanistan. The sandy desert features sandy plains, rocky areas, clay-covered areas, and small sandy hills. Nomadic tribes inhabit this desert. Recently, the desert has been observed to migrate westwards into agricultural areas. This migration has triggered a crisis situation in the region and displaced communities and destroyed villages.
50. Statement 1: CORRECT—Geographically, the Himalayas control the climate and especially the monsoon over the Indian subcontinent. The sheer height of the mountains stop the moisture laden winds from the Indian Ocean from being sucked into Central Asia, and ensure the monsoon rains.

    Statement 2: CORRECT—These mountains also act as a shield and keep away the cold and freezing winter winds which blow from
