Cobalt use in EV's Lithium ion batteries, economically DR of Congo is projected to become 'Saudi Arabia of EV age'. Cobalt is also widely used in high performance alloys, as a catalyst, as a pigmenting and colouring agent etc.

Cobalt mine production (2017) and reserves in tonnes according to UGS[50]		
Country	*Production*	*Reserves*
World total	110,000	7,100,00
DR Congo	64,000	3,500,000
Other Countries	5900	560,000
Russia	5600	250,000
Australia	5000	1,200,000
Canada	4300	250,000

22. The Copperbelt is a natural region in Central Africa which sits on the border region between northern Zambia and the southern Democratic Republic of Congo. It is known for copper mining.
23. The trade winds in two belts on the equatorial sides of the Horse Latitudes heat up as they move toward the Equator. These dry winds dissipate cloud cover, allowing more sunlight to heat the land. Most of the major deserts of the world lie in areas crossed by the trade winds. The world's largest desert, the Sahara of North Africa, which has experienced temperatures as high as 57°C, is a trade wind desert.
24. West African country of Ivory Coast (Cote d'Ivoire) is world's leading producer of Cocoa with 30% global market share. Ghana is next position with 20% share.
25. Eswatini, also called as Swaziland is in Southern part of Africa surrounded by Mozambique and South Africa.

Difficulty Level: Medium
