the Amazon Rainforest in South America. The river also has the second-largest flow in the world, behind the Amazon; the third-largest drainage basin of any river, behind the Amazon and Plate rivers; and is one of the deepest rivers in the world, at depths greater than 220 m.

45.

- Algeria is the largest country by area in Africa. Second largest is DR of Congo; Indian Ocean island country of Seychelles smallest both in terms of area and population.
- Nigeria is largest African country by GDP (nominal), which also largest country by population. South Africa is second largest.

46.

- There are 54 countries in Africa, excluding inter nationally partly recognised Somaliland. Africa has world's highest number of countries.
- World's driest non-polar place is McMurdo Dry valleys located in Desert Atacama of South America.

47. Out of the given countries, only Niger and Nigeria share border.

48.

- Humboldt current: A cold current which flows towards north in southern hemisphere along west coast of South America.
- Agulhas Current: A warm current which flows towards south along East African coast.
- Benguela current: A Cold Current in southern hemisphere and flows north along South African coast.
- Canary Current: A Cold Current in northern hemisphere and flows south along North West African coast.

49. The EAR runs from the Afar Triple Junction in the Afar Triangle of Ethiopia through eastern Africa, terminating in Mozambique. The EAR transects through Ethiopia, Kenya, Uganda, Rwanda, Burundi, Zambia, Tanzania, Malawi and Mozambique.

50. River Congo drains most of Congo, DR of Congo, Gabon, CAR, and some parts of Angola and Cameron. It is the only major river to cross the equator twice. Because its drainage basin includes areas both north and south of the equator, its flow is stable, as there is always at least one part of the river experiencing a rainy season. (See Figure)
