Falkland Islands *(UK),* French Guiana *(France),* South Georgia and the South Sandwich Islands

24. The famous tourist attraction Machu Picchu is in Peru.
25. The island of Tierra del Fuego lies in the extreme south of South America and the southernmost tip of this island is called the ‘Cape Horn’.

Difficulty Level: Medium

26. The eastern part of the South Pacific anticyclone influences the climate of most of South America’s west coast, causing stable, subsiding air conditions that yield minimal precipitation. The cold Peru (Humboldt) Current, flowing northward along the coast from southern Chile to the Equator, cools and further stabilises the Pacific air that drifts over the continent. One of the world’s driest regions, the Atacama Desert along the northern coast of Chile, results from those conditions.
27. As the westerlies rise over the Andes, most of their moisture is released in orographic precipitation, while on the lee side a typical rain shadow develops over the vast desert and semi-desert region of Patagonia. Vertical climatic zones are particularly well-defined in the Andes, ranging from humid to warm at the base or foothills; temperate and semi-humid at mid-level; cool and dry in the highlands; and cold to freezing in the glacial summit areas.
28. The tropical wet-dry, or savanna (grassy parkland), type-is characterised by high temperatures (all monthly means above 64 °F, or 18 °C) but receives less precipitation and experiences a prolonged dry season. That type of climate is found on the fringes of the tropical-rainy belt, in the Orinoco basin, on the Brazilian Highlands, and in part of western Ecuador. Temperatures are still high and annual variations small, but daily temperature extremes are greater, typically ranging from a low of 65 °F (18 °C) to a high of 95 °F (35 °C).
29. The temperate climates have a greater range of temperatures than the tropical climates and may include extreme climatic variations. Those climates, characterised by lower winter temperatures, are in south of the Tropic of Capricorn (in
