73. Mt. Cotopaxi- Ecuador
    Mt. Coropuna- Peru
    Mt. Aconcagua- Chile
    Mt. San Valentin- South Chile
74.
    1. Soybeans have become an increasingly lucrative crop in the Pampas.
    2. Brazil is the world's third-largest beef exporter (behind only Australia and the United States). Argentina is also an important beef exporter.
    3. Coffee is mainly produced in Colombia.
    4. Viti culture is prevalent in Valparaiso.
75. Atacama houses the world's largest deposits of copper. Brazil is South America's leading gold producer, with deposits in the Amazon basin accounting for much of the output. Peru has historically been one of the world's main silver exporters, primarily from mines extending from Cerro de Pasco to Huancayo in the Andes, but production has decreased since the early 1970s. Ecuadorean silver is located primarily in the Andes, while Colombia, Argentina, and Bolivia also exploit this metal in their highland areas. Platinum is found in the Cordillera Occidental of Colombia as well as in smaller quantities in association with the copper-mining activities of central Peru.
76. Soil erosion has ravaged a large part of the continent. According to some estimates, in several countries half or more of the presently arable land has been severely damaged or ruined by poor land high yields of wheat is now abandoned. Mountain management. In the Andes, land that once produced forests are still cleared for cattle grazing and cultivation, which greatly accelerates erosion and ruins the soil of the region for years thereafter. Soil damage has been less severe in areas of relatively flat terrain. Campaigns for soil conservation or restoration have been implemented in most countries.
