Select the correct option:

(a) 1,2,3
(b) 2,3
(c) 1,4
(d) 1,2,3,4

59. Which of the following are correct regarding role of Indian Ocean Dipole (IOD) on Australia?
    1. Warmer than average sea surface temperatures can provide more moisture for frontal systems and lows crossing Australia.
    2. IOD generally coincide with the summer crop growing season.
    3. Events usually start around May or June.
    4. It peaks between August and October.

    Select the correct option:

    (a) 1,2,3
    (b) 2,3,4
    (c) 1,3,4
    (d) 1,2,3,4

60. Which of the following are correct regarding impact of Blocking highs on Australia?
    1. Blocking highs disrupt the flow of low pressure systems across southern Australia.
    2. These highs essentially “block” the west to east progression of weather systems across southern Australia.
    3. As frontal systems approach the blocking high, they become more violent.

    Select the correct option:

    (a) 1,2 only
    (b) 2,3 only
    (c) 1,3 only
    (d) 1,2,3

61. Which of the following are correct regarding Cut-off lows?
    1. Cut-off lows bring enhanced rainfall to parts of Northern Australia.
    2. A cut-off low may develop when a low pressure system forms on an active cold front.
    3. Alternatively, they may form in an unstable easterly flow on the northern flank of a slow- moving or blocking high.
