3. MJO effects are most evident over the Indian Ocean and western equatorial Pacific.
4. Tropical cyclones are also more likely to develop in association with certain phases of a strong MJO event.

Select the correct option:

(a) 1,2
(b) 2,3,4
(c) 1,3,4
(d) 1,2,3,4

65. Which of the following are correct regarding Northwest cloudbands?
    1. Northwest cloudbands bring rain to much of northwestern Australia and lowers rainfall activity over central and southeastern Australia.
    2. Northwest cloudbands are formed when warm, moist tropical air originating over the Indian Ocean moves poleward.
    3. Northwest cloudbands can also interact with cold fronts and cut-off lows over southeastern Australia.
    4. When Indian Ocean sea surface temperatures to the northwest of Australia are warmer than average, northwest cloudbands may become more frequent and produce heavier rainfall.

    Select the correct option:

    (a) 1,2,3
    (b) 2,3,4
    (c) 1,3,4
    (d) 1,2,3,4

66. Arrange the following from north to south.
    1. Great Sandy desert
    2. Great Victoria desert
    3. Gibson desert
    4. Tanami desert Select the correct option

    (a) 1-3-4-2
    (b) 2-1-4-3
    (c) 3-4-2-1
    (d) 4-1-3-2

67. Arrange the following from South to North.
    1. Canberra
