(c) Cloudy skies
(d) Warm breezes from the ocean

36. Which of the following is/are true?
    1. The pressure on earth decreases with height.
    2. Variation in pressure is the primary cause of air motion.
    3. Air expands when heated and gets compressed when cooled. This results in variations in the atmospheric pressure.

    (a) 1, 2
    (b) 1, 3
    (c) 1, 2, 3
    (d) 2, 3

37. Which of the following statements is/are true?
    1. The Coriolis force acts perpendicular to the pressure gradient force.
    2. The pressure gradient force is perpendicular to an isobar.
    3. The higher the pressure gradient force the larger is the deflection in the direction of wind.

    (a) 2 only
    (b) 1, 2
    (c) 2,3
    (d) 1, 2, 3

38. Condensation occurs when.
    (a) the air mass losses its heat
    (b) when the dew point reaches its freezing point
    (c) the volume of air mass increases
    (d) moistre is removed from the air mass

39. What is the difference between the tundra climate and the ice cap climate?
    (a) Low growing plants can be seen in both the climates
    (b) Permafrost can be seen in tundra climate
    (c) Rain fall occurs in ice cap climate
    (d) Both are same there are no as such differences

40. Where can we find fossil fuels?
    (a) Continental shelf (b) Continental slope
    (c) Deep sleep plains (d) Sea shores

41. Which of the following effects ocean salinity?
    1. It depends mainly on evaporation and precipitation.
