3. The average temperature of surface water of the oceans is about 27°C and it gradually decreases from the equator towards the poles.
4. The oceans in the northern hemisphere record relatively higher temperature than in the southern hemisphere.

(a) 1, 2
(b) 1,2, 3, 4
(c) 2, 3, 4
(d) 1,2 ,3

76. Which of the following is/are true?
1. Ocean currents are the continuous flow of huge amount of water in a definite direction and water moves ahead from one place to another through the ocean currents.
2. The waves are the horizontal motion of water and the water in the waves does not move, but the wave trains move ahead.
3. Slow and steady waves are fairly young ones and are probably formed by local wind, steep and waves originate from far away places, possibly from another hemisphere.

(a) 1 , 2
(b) 2, 3
(c) 1, 3
(d) 1, 2, 3

77. Which of the following statements are true?
1. On the surface of the earth, nearest the moon, pull or the attractive force of the moon is greater than the centrifugal force.
2. On the opposite side of the earth, the attractive force is less and the gravitational force is more.
3. On the surface of the earth, the horizontal tide generating forces are less important than the vertical forces in generating the tidal bulges.

(a) 1 only
(b) 2 only
(c) 1, 3
(d) 1, 2, 3

78. Which of the below is not true regarding the ocean currents?
