pleistocene period, diverted the Ganga and the Brahmaputra systems to flow towards the Bay of Bengal.

53. Indus cuts across the Ladakh range, forming a spectacular gorge near Gilgit in Jammu and Kashmir.

The Indus river passes gigantic gorges 4500-5200 metres (15,000-17,000 feet) deep near the Nanga Parbat massif.

The Gilgit, Gartang, Dras, Shiger, Hunza are Himalayan tributaries of the Indus.

54. The Indus receives a number of Himalayan tributaries such as the Shyok, the Gilgit, the Zaskar, the Hunza, the Nubra, the Shigar, the Gasting and the Dras.

The Ravi River is a transboundary river crossing northwestern India and eastern Pakistan. It is one of six rivers of the Indus System in Punjab region. The waters of the Ravi are allocated to India under the Indus Water Treaty. Under the Indus Waters Treaty of 1960, the waters of the Ravi and five other rivers are divided between India and Pakistan.

It has its source in Kullu hills near the Rohtang Pass in Himachal Pradesh. It drains the area between the Pir Panjal and the Dhaola Dhar ranges. After crossing Chamba, it takes a south-westerly turn and cuts a deep gorge in the Dhaola Dhar range.

It enters Punjab Plains near Madhopur and later enters Pakistan below Amritsar.

It debouches into the Chenab a little above Rangpur in Pakistani Punjab.

55. It rises in the Gangotri glacier near Gaumukh (3900 m) in the Uttarkashi district of Uttarakhand. Here, it is known as the Bhagirathi. It cuts through the Central and the Lesser Himalayas in narrow gorges.

The Ganga river system outspreads in India, Tibet (China), Nepal and Bangladesh. It is the largest river basin in India and accounts for about one-fourth of the total area of the country. The Ganga is called the Bhagirathi above Devprayag and below this town, the Ganga.

56. The river has a length of 2525 km. It is shared by Uttarakhand (110 km) and Uttar Pradesh (1450 km), Bihar (445 km) and West
