Demography of India

DIFFICULTY LEVEL: EASY

1. India's population as on March 2011 stood at _____ million, which accounts for 17.5% of the world's population.
   (a) 1210.6
   (b) 1310.6
   (c) 1410.6
   (d) 1510.6
2. India's population has been steadily increasing _____.
   (a) from 361 million in 1951 to 1310 million in 2011
   (b) from 351 million in 1951 to 1210 million in 2011
   (c) from 361 million in 1951 to 1210 million in 2011
   (d) from 361 million in 1951 to 1215 million in 2011
3. What are the main processes of change of population?
   (a) Birth rates
   (b) Death rates
   (c) Migration
   (d) All the above
4. What are the geographical factors influencing the distribution of the population?
   (a) Availability of water
   (b) Land forms
   (c) Climate
   (d) All the above
5. Which theory can be used to describe and predict the future population of any area?
   (a) Demographic transition theory
   (b) Population theory
