29. Consider the following statements regarding the demography of population:
    1. India has one of the youngest populations in an aging world. By 2030, the median age in India will be just 28, compared to 37 in China and the US, 45 in Western Europe, and 49 in Japan.
    2. This transition happens largely because of a decrease in the total fertility rate (TFR) which is the number of births per woman after the increase in life expectancy gets stabilised.

    Choose the correct answer:
    (a) 1 is wrong
    (b) 2 is wrong
    (c) Both are wrong
    (d) Both are correct

30. Consider the following statements:
    1. Better economic growth brought about by increased economic activities due to higher working age population and lower dependent population.
    2. Demographic dividend has historically contributed up to 15% of the overall growth in advanced economies.

    Identify the correct statement:
    (a) Only 1
    (b) Only 2 is wrong
    (c) Both are correct
    (d) Both are wrong

DIFFICULTY LEVEL: TOUGH

31. Consider the following statements regarding density of the population.
    1. Population density is the number of people living in a unit area of the earth's surface.
    2. South Central Asia has the highest density of population followed by East and South East Asia.

    Which of the statements given above are correct?
    (a) Only 1
