They also have high harvest index, i.e., ratio of grain to straw. The new varieties made it possible for rice to be cultivated in non-traditional areas. However, these did not suit the traditional northeastern region as they were susceptible to pests in the humid conditions; besides, there was a lack of optimal use of fertilisers and poor water management.

21. In Eurasia, the Sumerians started to live in villages from about 8,000 BC, relying on the Tigris and Euphrates rivers and a canal system for irrigation. Farmers grew wheat, barley, vegetables such as lentils and onions, and fruits including dates, grapes, and figs. Ancient Egyptian agriculture relied on the Nile River and its seasonal flooding.

    Staple food crops were grains such as wheat and barley, alongside industrial crops such as flax and papyrus. In China, from the 5th century BC, there was a nationwide granary system and widespread silk farming. Water-powered grain mills were in use by the first century BC, followed by irrigation. These slowly spread westwards across Eurasia.

22. In 2003, the production of agricultural products was approximately worth ' 38 billion, hence, making India the seventh largest agricultural exporter. India is second in agricultural outputs and therefore GDP of the country is based on agriculture. Rice, Milk, Sugar Cane and Wheat are the crops yielding highest outputs.

    Problems in agriculture were challenging but Green revolution solved the problems with the introduction of chemicals, fertilizers and pesticides to increase the agricultural productivity. The green revolution is an agricultural revolution, therefore it is the 3rd agricultural revolution around the world. Therefore, Fiber, Food, Fuels and raw materials are the subdivisions of the agricultural crops.

23. Green Revolution was from 1930-1960. It revolutionised the agriculture field including new agricultural technologies and Irrigational System. Norman Borlaug is one of the leaders of this revolution, Hence he was” Father of Green Revolution”. He saved billions of people from starvation and hence given the Noble Price. Quality of diet improved over the world after the green revolution.
