Green revolution solved problems like Hunger and malnutrition. The increase in chemical fertilizers and pesticides deteriorated the health of people introducing Cancer and leukaemia. This terminal illness was the result of chemicals and pesticides used in growing crop.

24. Tropical Evergreen Rainforests: These grow in regions that receive an excess of 200 cm of rainfall. Here the trees never shed their leaves, hence are known as evergreen. These are dense forests found in Arunachal Pradesh, Meghalaya, Assam etc.
25. Our national animal - the tiger, is one such rare animal found in India. In fact, the Bengal tiger can be found nowhere else on earth. We also have the Asiatic Lion, the only species of lions found outside Africa. It is home to many such exotic animals such as the Indian Elephant, the rhinoceroses and the leopard.

    To preserve these amazing animals and their natural habitats, we have many conservatories, national parks and wildlife sanctuaries. In recent times to bring down illegal hunting and poaching the government has passed some very strict laws as well.

Difficulty Level: Medium

26. Statement I: CORRECT—Land resource is more crucial to the livelihood of the people depending on agriculture: Agriculture is a purely land based activity unlike secondary and tertiary activities. In other words, contribution of land in agricultural output is more compared to its contribution in the outputs in the other sectors. Thus, lack of access to land is directly correlated with incidence of poverty in rural areas. Quality of land has a direct bearing on the pro-ductivity of agriculture, which is not true for other activities.
    Statement II: CORRECT—In rural areas, aside from its value as a productive factor, land ownership has a social value and serves as a security for credit, natural hazards or life contingencies, and also adds to the social status.

    An estimation of the total stock of agricultural land resources (i.e., total cultivable land) can be arrived at by adding up net sown area, all fallow lands and cul- turable wasteland. It may be
