water foot print is a solution for ensuring adequate protein rich food to the population.

Statement II: CORRECT—India has seen a huge growth in cooperative societies, mainly in the farming sector, since 1947 when the country gained independence from Britain. The country has networks of cooperatives at the local, regional, state and national levels that assist in agricultural marketing. The commodities that are mostly handled are food grains, jute, cotton, sugar, milk, fruit and nuts Support by the state government led to more than 25,000 cooperatives being set up by the 1990s in the state of Maharashtra.

35. Statement I: CORRECT—India has very poor rural roads affecting timely supply of inputs and timely transfer of outputs from Indian farms. Irrigation systems are inadequate, leading to crop failures in some parts of the country because of lack of water. In other areas regional floods, poor seed quality and inefficient farming practices, lack of cold storage and harvest spoilage cause over 30% of farmer's produce going to waste, lack of organised retail and competing buyers thereby limiting Indian farmer's ability to sell the surplus and commercial crops.

    Statement II: CORRECT—Although India has attained self-sufficiency in food staples, the productivity of its farms is below that of Brazil, the United States, France and other nations. Indian wheat farms, for example, produce about a third of the wheat per hectare per year compared to farms in France. Rice productivity in India was less than half that of China. Other staples productivity in India is similarly low.

36. Statement I: CORRECT—Based on 2012 data, India is home to the fourth largest agricultural sector in the world. India has an estimated 180 million hectares of farmland with 140 million of which are planted and continuously cultivated. Yet India's agricultural profile is shadowed by the controversial impacts of Green Revolution policies that were adopted in the 1960s and 70s with pressure from the United States Agency for International Development and the World Bank.

    Statement II: CORRECT—India's agricultural sector today still faces issues of efficiency due to lack of mechanisation with poorer
