modern inputs. It is known by different names in different parts of the country.

11. Statement I: CORRECT—Rice is one of the chief grains of India. Moreover, this country has the largest area under rice cultivation, as it is one of the principal food crops. It is in fact the dominant crop of the country. India is one of the leading producers of this crop. Rice is the basic food crop and being a tropical plant, it flourishes comfortably in hot and humid climate. Rice is mainly grown in rain fed areas that receive heavy annual rainfall.

    That is why it is fundamentally a kharif crop in India. It demands temperature of around 25 degree Celsius and above and rainfall of more than 100 cm. Rice is also grown through irrigation in those areas that receives comparatively less rainfall. Rice is the staple food of eastern and southern parts of India. In 2009-10, total rice production in India amounted to 89.13 million tonnes, which was much less than production of previous year, 99.18 million tonnes. Statement II: CORRECT—Rice can be cultivated by different methods based on the type of region. But in India, the traditional methods are still in use for harvesting rice. The fields are initially ploughed and then fertiliser is applied which typically consists of cow dung and then the field is smoothed. The seeds are transplanted by hand and then through proper irrigation, the seeds are cultivated. Rice grows on a variety of soils like silts, loams and gravels. It can also tolerate alkaline as well as acid soils. However, clayey loam is well suited to the raising of this crop. Actually the clayey soil can be easily converted into mud in which rice seedlings can be transplanted easily.

12. Statement I: CORRECT—Winter rice crop is a long duration crop and summer rice crop is a short duration crop. At some places in the eastern and southern parts of India, rice crop of short duration is followed by the rice crop of long duration. Winter rice crop is raised preferably in low-lying areas that remain flooded mainly during the rainy season.

    Autumn rice is raised in Uttar Pradesh, Maharashtra, Rajasthan, Madhya Pradesh, Punjab and Himachal Pradesh. Summer, autumn and winter rice crops are raised in West Bengal,
