if the buyers willing to pay, local producers are not able to make their first sale outside the prescribed markets (mandis), which are dominated by commission agents and contractors. The present government is now taking steps to create a nationwide market for agricultural produce. The problem is particularly severe in the case of perishable products such as fresh fruits, vegetables and flowers.

69. Statement I: INCORRECT—ADB prepared itself for operations in these areas by undertaking studies on: (i) the policies and priorities of the government in the agriculture sector, (ii) the prevalence of participatory irrigation management, (iii) integrated water resource management (IWRM), (iv) tank irrigation systems, and (v) prospects for agribusiness development. ADB's first operation, a loan supporting the renovation of a minor participatory irrigation system in Chhattisgarh, was prepared with the help of project preparatory technical assistance (PPTA), and was approved in 2005.

    Statement II: INCORRECT—The succeeding country partnership strategy (CPS), 2008-2012 reaffirmed ADB's engagement in rural infrastructure, including irrigation, water resources management, rural markets, and transport facilities. The proposed investments were in line with the priorities of the government's five year plan and ADB's Strategy 2020 and a broader water fina.

70. Statement I: CORRECT—Nomadic herding or pastoral nomadism is a primitive subsistence activity, in which the herders rely on animals for food, clothing, shelter, tools and transport. They move from one place to another along with their livestock, depending on the amount and quality of pastures and water. Each nomadic community occupies a well-identified territory as a matter of tradition.

    Statement II: CORRECT—A wide variety of animals is kept in different regions. In tropical Africa, cattle are the most important livestock, while in Sahara and Asiatic deserts, sheep, goats and camel are reared. In the mountainous areas of Tibet and Andes, yak and llamas and in the Arctic and sub-Arctic areas, reindeer are the most important animals.
