which links the estates to the factories and markets for the export of the products.

Statement II: CORRECT—The French established cocoa and coffee plantations in West Africa. The British set up large tea gardens in India and Sri Lanka, rubber plantations in Malaysia and sugarcane and banana plantations in West Indies.

Spanish and Americans invested heavily in coconut and sugarcane plantations in the Philippines. The Dutch once had monopoly over sugarcane plantation in Indonesia. Some coffee fazendas (large plantations) in Brazil are still managed by Europeans.

74. Statement I: CORRECT—This form of agriculture is found in the highly developed parts of the world, e.g., North-western Europe, Eastern North America, parts of Eurasia and the temperate latitudes of Southern continents. Mixed farms are moderate in size and usually the crops associated with it are wheat, barley, oats, rye, maize, fodder and root crops. Fodder crops are an important component of mixed farming. Crop rotation and intercropping play an important role in maintaining soil fertility.

Statement II: CORRECT—Dairy is the most advanced and efficient type of rearing of milch animals. It is highly capital intensive. Animal sheds, storage facilities for fodder, feeding and milching machines add to the cost of dairy farming. Special emphasis is laid on cattle breeding, health care and veterinary services.

It is highly labour intensive as it involves rigorous care in feeding and milching. There is no off season during the year as in the case of crop raising.

75. Statement I: CORRECT—Depending on the mode of occurrence and the nature of the ore, mining is of two types: surface and underground mining. The surface mining also known as open-cast mining is the easiest and the cheapest way of mining minerals that occur close to the surface.

Overhead costs such as safety precautions and equipment is relatively low in this method. The output is both large and rapid.

Statement II: CORRECT—When the ore lies deep below the surface, underground mining method (shaft method) has to be
