goods), coal mining industry (extraction of coal) and tourism industry (service provider).

Industries can be classified on the basis of raw materials, size and ownership.

Raw Materials: Industries may be agro based, mineral based, marine based and forest based depending on the type of raw materials they use. Agro based industries use plant and animal based products as their raw materials. Food processing, vegetable oil, cotton textile, dairy products and leather industries are examples of agro-based industries. Mineral based industries are primary industries that use mineral ores as their raw materials.

24. An industrial system consists of inputs, processes and outputs. The inputs are the raw materials, labour and costs of land, transport, power and other infrastructure. The processes include a wide range of activities that convert the raw material into finished products.

    The outputs are the end product and the income earned from it. In case of the textile industry the inputs may be cotton, human labour, factory and transport cost. The processes include ginning, spinning, weaving, dyeing and printing. The output is the shirt you wear.

25. Before 1947, there was only one iron and steel plant in the country - Tata Iron and Steel Company Limited (TISCO). It was privately owned. After Independence, the government took the initiative and set up several iron and steel plants. TISCO was started in 1907 at Sakchi, near the confluence of the rivers Subarnarekha and Kharkai in Jharkhand. Later on Sakchi was renamed as Jamshedpur. Geographically, Jamshedpur is the most conveniently situated iron and steel centre in the country.

Difficulty Level: Medium

26. Statement I: CORRECT—Indian textile industry, the second largest manufacturer and exporter in the world, contributes 12.65% to manufacturing and 2.3% to GDP. India has a share of 5% of the global trade in textiles and apparel. During 2018-19, the
