machines or devices communicating among themselves through a network without human intervention.

Sensors and communication modules are often embedded within M2M devices, enabling data to be transmitted from one device to another device through wired and wireless communications networks. The transformational impact of M2M/IoT for the common people will be realised through transformation of the way services are designed and how they utilise information to meet the needs of citizens more efficiently and effectively.

34. Statement I: CORRECT—FDI in telecom sector: FDI has played a crucial role in shaping the progress of the telecom sector over the years by providing much needed finances for expansion of telecom infrastructure in the country. During 2018-19, FDI equity inflow touched $2.67 billion - more than double rise from the level of $1.3 billion witnessed in 2015-16.

The substantial foreign inflows in the telecom sector is indicative of the faith of global community in Government policy, reforms and measures taken towards ease of doing business, as well as the bright prospects of the telecom sector in the country.
Statement II: CORRECT—Digital Communications Commission: until recently known as the Telecom Commission, was set up by the Government of India vide resolution dated 11 April 1989 with administrative and financial powers of the Government of India to deal with various aspects of Telecommunications. Vide Resolution dated 22 October 2018, the 'Telecom Commission' has been re-designated as the 'Digital Communications Commission' to ensure effective implementation and monitoring of the newly announced 'National Digital Communications Policy-2018'.

35. Statement I: CORRECT—The Government aims to "Reform, Perform and Transform" the energy sector of the country by achieving self-sufficiency. India's primary energy demand is expected to grow at a CAGR of 4.21% during 2017-2040, much faster than any major economy in the world. There is thus a need to augment refining capacity to meet growing demand for petroleum fuels and petrochemicals, which play significant role in sustaining GDP.
