sector. Along with physical infrastructure; provision of social infrastructure is also equally important as these two would determine where India will be placed in the world by 2030.

11. Statement I: CORRECT—Industrial locations are complex in nature.

These are influenced by availability of raw material, labour, capital, power and market, etc. It is rarely possible to find all these factors available at one place. Consequently, manufacturing activity tends to locate at the most appropriate place where all the factors of industrial location are either available or can be arranged at lower cost.

Statement II: CORRECT—After an industrial activity starts, urbanisation follows. Sometimes, industries are located in or near the cities. Thus, industrialisation and urbanisation go hand in hand. Cities provide markets and also provide services such as banking, insurance, transport, labour, consultants and financial advice, etc., to the industry. Many industries tend to come together to make use of the advantages offered by the urban centres known as agglomeration economies. Gradually, a large industrial agglomeration takes place.

12. Statement I: CORRECT—The textile industry occupies a unique position in the Indian economy, because it contributes significantly to industrial production (14%), employment generation (35 million persons directly - the second largest after agriculture) and foreign exchange earnings (about 24.6%). It contributes 4% towards GDP. It is the only industry in the country, which is self-reliant and complete in the value chain i.e., from raw material to the highest value added products.

Statement II: CORRECT—In ancient India, cotton textiles were produced with hand spinning and han- dloom weaving techniques. After the 18th century, power-looms came into use. Our traditional industries suffered a setback during the colonial period because they could not compete with the mill-made cloth from England.

13. Statement I: CORRECT—India is the largest producer of raw jute and jute goods and stands at second place as an exporter after Bangladesh. There were about 80 jute mills in India in 2010-11.
