But the production of hand woven cotton textile was expensive and time consuming. Hence, traditional cotton textile industry could not face the competition from the new textile mills of the West, which produced cheap and good quality fabrics through mechanised industrial units.

62. Statement I: INCORRECT—The first successful mechanised textile mill was established in Mumbai in 1854. The warm, moist climate, a port for importing machinery, availability of raw material and skilled labour resulted in rapid expansion of the industry in the region. Initially this industry flourished in the states of Maharashtra and Gujarat because of favourable humid climate.

But today, humidity can be created artificially, and raw cotton is a pure and not weight losing raw material, so this industry has spread to other parts of India. Coimbatore, Kanpur, Chennai, Ahmedabad, Mumbai, Kolkata, Ludhiana, Puducherry and Panipat are some of the other important centres.

Statement II: CORRECT—It is located in Gujarat on the banks of the Sabarmati River. The first mill was established in 1859. It soon became the second largest textile city of India, after Mumbai. Ahmedabad was therefore often referred to as the 'Manchester of India'. Favourable locational factors were responsible for the development of the textile industry in Ahmedabad.

Ahmedabad is situated very close to cotton growing area. This ensures easy availability of raw material. The climate is ideal for spinning and weaving. The flat terrain and easy availability of land is suitable for the establishment of the mills.

63. Statement I: CORRECT—Textile industry includes cotton, jute, wool, silk, and synthetic fibre textiles. India is on of the leading producers of textile goods. It is one of the largest and most important sector in the economy in terms of output, foreign exchange earnings, and employment in India

India enjoyed monopoly in the production of textile goods from 1500 BC to 1500 AD. Indian cotton and silk textiles were in great demand all over the world. It was the arrival of the British in India and the Industrial Revolution in Britain in 1779 which led to the downfall of the Indian manufacturing.
