SET 1

Practice Test Paper

1. Consider the following statements and select the correct answer using the code given below:
   1. A galaxy is a huge mass of stars, nebulae and inter-stellar material.
   2. Each galaxy comprises an average of 100 billion stars.
   3. Galaxies are the major building blocks of the universe.
   4. Galaxies may be regular or irregular in shape.

   Codes:

   (a) 1, 2 and 3 are correct
   (b) 2, 3 and 4 are correct
   (c) 1, 3 and 4 are correct
   (d) 1, 2, 3 and 4 are correct
2. Examine the following statements and select the correct answer using the code given below:
   1. A dark patch on the surface of the Sun is known as a sunspot.
   2. Sunspots appear as dark areas because they are about 1500°C cooler than the surrounding chromospheres.
   3. The individual sunspot may last from a few days to a few months.
   4. The number of visible sunspots fluctuate in an 11-year cycle.

   Codes:

   (a) 1, 2 and 3 are correct
   (b) 2, 3 and 4 are correct
   (c) 1, 3 and 4 are correct
   (d) 1, 2, 3 and 4 are correct
3. Examine the following statements and select the correct answer using the code given below:
   1. The outer most layer of the Earth is known as crust.
   2. The Earth crust is above the Mohorovicic (Moho) discontinuity.
