formed by glacial deposition are not common. Marine deposition usually does not lead to formation of mushroom rocks.

90. Black Sea is not a lake since Bosporus and Dardanelles Straits connect it to the Mediterranean Sea. Many big rivers fall into the Black Sea, making the salinity of its surface water half that of the ocean: 17%. Caspian Sea and Dead Sea are lakes. The surface and shores of the Dead Sea are 423 metres below sea level, making it Earth's lowest elevation on land.

91. The correct combination is
    1. Katanga Plateau : South America (Congo)
    2. Iberian Plateau : South-West Europe (Spain)
    3. Lake Vostok : Antarctica
    4. Altai Mountains : Central and East Asia (Russia, China, Mongolia, Kazakhstan)

92. Acidic lavas have more viscosity because of which the lavas do not not move quickly and solidifies quickly. This helps in building layer over layer in a narrow region i.e huge volcanic mountain and volcanic islands. On the other hand, basaltic lavas have less viscosity because of which it moves quickly and causes sea floor spreading and oceanic ridges but not volcanic islands.

93. See Fig. on next page

94. **Lake Baikal** in Siberia lies in an active rift valley. Lake Baikal is the **largest (by volume) freshwater lake in the world**, containing roughly 20% of the world's unfrozen surface fresh water. Chagos group of islands is the southernmost archipelago of the Chagos-Laccadive Ridge, a long submarine mountain range in the Indian Ocean. Kuril Trench is an oceanic trench in the northwest Pacific Ocean. It lies off the southeast coast of Kamchatka and parallels the Kuril Island chain to meet the Japan Trench east of Hokkaido.

95. Compound coastlines show the forms of emergence and submergence coastlines combined. For example, submergence followed by emergence or vice versa. The coastlines of Norway and Sweden are examples of compound coastlines. West Coast of India is an example of compound coastline as the northern part is submerged and the southern part (Malbar Coast) is emergent. Coromandel Coast is a coast of emergence.
