(d) Bora

10. Which place is the best source region for the formation of air masses among below mentioned places?
    (a) Himalayas
    (b) Mediterranean Sea
    (c) Siberian Plain
    (d) Equatorial Forests
11. Why do winds not flow from tropical high pressure (in upper troposphere) to polar low (in upper troposphere) directly because
    (a) Winds are geostrophic.
    (b) Greater coriolis force.
    (c) Low frictional force
    (d) All of the above
12. Which of the following is/are permanent jet stream/s?
    (a) Subtropical Jet Stream (STJ)
    (b) The Tropical Easterly Jet
    (c) The Somali Jet
    (d) All of the above
13. What is Dew point?
    (a) If the air has half the amount of moisture that it can carry, then it is unsaturated and it is called as Dew point.
    (b) It is the weight of water vapour per unit weight of air.
    (c) It means that the air at the given temperature is incapable of holding any additional amount of moisture at that stage.
    (d) None of the above
14. Which one of the following is a long duration rainfall cloud?
    (a) Cumulus
    (b) Cumulonimbus
    (c) Nimbostratus
    (d) Cirrostratus
15. Sun’s halo is produced by the refraction of light in
    (a) Water vapour in Stratus clouds
    (b) Ice crystals in Cirrocumulus clouds
    (c) Ice crystals in Cirrus clouds
    (d) Dust particles in Stratus clouds
16. Which one of the following process is responsible for transforming solid into gas?
