2. The origin of igneous rocks is closely associated with the movement of plate tectonics.
3. The volcanoes are the best examples of igneous rocks.

Codes:

(a) 1 and 2 are correct
(b) 2 and 3 are correct
(c) 1 and 3 are correct
(d) 1, 2 and 3 are correct

4. Consider the following statements and select the correct answer using the code given below:
   1. All the processes acting at or near the surface of the Earth are known as weathering.
   2. Weathering is not effective in hard granite.
   3. Frost action is an important form of physical weathering.
   4. Frost action is limited to mid-latitudes and high altitudes.

   Codes:

   (a) 1, 2 and 3 are correct
   (b) 1, 3 and 4 are correct
   (c) 2, 3 and 4 are correct
   (d) 1, 2, 3 and 4 are correct
5. Examine the following facts about planet Mars and select the correct answer using the code given below:
   1. The length of day on Mars is 24.62 hours.
   2. The length of year is 1.88 days of Earth year.
   3. The temperature on Mars varies between –173°C and 37°C.

   Codes:

   (a) 1 and 2 are correct
   (b) 1 and 3 are correct
   (c) 2 and 3 are correct
   (d) 1, 2 and 3 are correct
6. Consider the following statements and select the correct answer using the code given below:
   1. A process that bends and forms beds of various rocks subjected to compressional forces is known as folding.
   2. The process whereby displacement and fracturing occurs between two portions of Earth’s crust is known as faulting.
   3. Faulting is usually associated with earthquake activity.
