(a) During chemical weathering, rocks are decomposed.
(b) During chemical weathering, the internal structure is destroyed.
(c) New minerals are created during chemical weathering.
(d) Chemical weathering does not occur in dry deserts.

11. Consider the following statements and select the correct answer using the code given below:
    1. Sedimentary rock sequence preserve records of erosion through time.
    2. Each bedding plane of a sedimentary rock is a remnant of what was once a surface of the Earth.
    3. Each rock layer is the product of a previous period of erosion.
    4. The texture of sedimentary rock and fossils are important indicators of global change.

    Codes:

    (a) 1, 2 and 3 are correct
    (b) 2, 3 and 4 are correct
    (c) 1, 3 and 4 are correct
    (d) 1, 2, 3 and 4 are correct
12. The sky looks blue because of:
    (a) Absorption of blue light in the atmosphere.
    (b) Reflection of blue colour of the oceans.
    (c) Selective absorption of radiation by the atmosphere.
    (d) Selective scattering of radiation by the atmosphere.
13. Which one of the following statements is not correct?
    (a) The Southern Hemisphere records more rainfall than the Northern Hemisphere.
    (b) The maximum rainfall occurs in a belt about 10 to 20 degrees wide near the equator.
    (c) Low rainfall is recorded between 20° and 30° North and South.
    (d) Latitudes 0° to 10° South have more rainfall than latitudes 0° to 10° North.
14. Which one of the following statements is not correct about the tropical cyclones?
    (a) Tropical cyclones give torrential rainfall.
    (b) They are known as Taifu in Philippines.
