1. A process by which the cold front of a rotating low-pressure system catches up the warm front, so that the warm air between them is forced upwards.
2. Such a front is formed when a cold air mass overtakes a warm air mass and goes underneath it.
3. Frontolysis begin when warm sector diminishes and the cold air mass completely undertakes the warm sector on ground.

What is the type Front which satisfies above mentioned conditions.

(a) Cold Front
(b) Stationary Front
(c) Warm Front
(d) Occluded Front

48. Which of the following are incorrect regarding Relative Humidity ?
1. Relative Humidity is always greater than Absolute Humidity.
2. Relative Humidity is greater over the continents and least over the oceans.

Select the correct option:

(a) 1 only
(b) 2 only
(c) Both 1 and 2
(d) None of the above

49. Which of the following are correct regarding Specific Humidity?
1. It is expressed as the weight of water vapour per unit weight of air.
2. The specific humidity is not affected by changes in pressure or temperature.
3. Specific humidity is a constant.

Select the correct option:

(a) 1,2 only
(b) 2,3 only
(c) 1,3 only
(d) 1,2,3

50. Which of the following are incorrect regarding Dew?
1. Dew and fog result when the temperature is higher than the freezing point.
2. The ideal conditions for its formation are clear sky, calm air, high relative humidity.
