3. Narmada River is among the major rivers in peninsular India which flows from east to west towards rift valley, so statement 1 is correct.
   Narmada enters structural channel between Vindhya and Satpura ranges and flows across Madhya Pradesh and Gujarat in Gulf of Khambhat, so statement 2 is also correct but that is not the reason for flow towards west.
   Statement 3 is incorrect.
4. On Earth, apart from ice caps and glaciers, the fresh water in maximum proportion exists as groundwater which approximates 25 to 30% as described from the global distribution table, so option (c) is correct.
