5. Statement 1 is correct as the Nokrek Biosphere Reserve which is a national park is located in West Garo Hills. Statement 2 is incorrect as Logtak (Loktak) Lake is located in Manipur and not within Barail Range as these are mountain ranges which separates Barak and Brahmaputra Valleys of Assam. Statement 3 is incorrect as Namdapha National Park borders to south and east by Patkai hills and not by Daphla Hills, so only option ais correct.
6. 1 is correct as Electromagnetic radiation brings changes in Earth's surface through rainfall, wind, and certain climatic factors. Statement 2 is correct as Geothermal energy is thermal energy generated and stored in Earth which helps in mitigation of climate change. Statement 3 is correct as Gravitational Force is responsible for landslides, river flow and related diastrophic changes in earth's surface. Statement 4 is correct as plate movements create rift valleys, mountains and several large scale physical features which brings dynamic changes on earth's surface. Statement 5 is incorrect as rotation of earth is responsible for climate and does not relate to large changes on earth's surface. Statement 6 is not correct as revolution of earth results in seasonal changes only without concerning any changes on earth's surface, so the correct option is (a).
7. Ramganga river flows through Jim Corbett National Park and not Ganga river, so it is incorrect. Kaziranga National Park is located on flood plains of Brahmaputra River and not on Manas river, so this also incorrect. Silent Valley National Park is an ecologically diverse area located on Kunti river and not on Kaveri river, hence it is also incorrect. From the options given in the question, none of them is correct, so correct option is (d).
8. It is seen that the world's most productive fishing grounds are located where warm and cold currents meet as these regions tend to have regular foggy conditions and because of this lot of weeds are found in that area which makes the fishes to attract for their feed, so option (c) is correct.
9. Statement 1 "Presence of tall closely set trees with crowns forming a continuous canopy " is correct as equatorial forests has different types of trees and other plants that are growing closely in small area where crowns of trees about 65 feet to 130 feet high
