which are tightly packed together that looks as canopy from above and not allow sunlight to enter. Statement 2 “Coexistence of a large number of species” is correct as in such forest, there are 750 species of tree and 1500 species of flowering plant in 4 square miles of forest. Statement 3 “Presence of numerous varieties of epiphytes” is correct as many epiphytes plant grow on trees, as all 3 statements are correct, so correct option is (d).

10. Temperature at coastal is not so hot as compared to portion inside the continent as water having higher heat capacity as compared to soil and rock allows ocean to take longer time to heat and to cool the land. Since coastal areas have more moderate temperatures as compared to inland areas because of heat capacity, the areas near ocean remains cooler during day with moderate temperature range as to inland areas, which clearly supports option (a) as annual temperature range of continent and inside of continent differs due to thermal difference among land and water.
11. Laterite soil in India contains iron and aluminium that is rusty red in colour due to presence of iron oxide found in hot and wet tropical areas. Tea, coffee, cashew, rubber and coconut mostly grows in such soil. We see that the description clearly satisfies statements 1 and 4, so correct option is (c).
12. Statement 1 is correct as shale a non-conventional natural gas which is found in Gondwana rock. Statement 2 is correct as Koderma was considered as the mica capital of India. Statement 3 is incorrect as Dharwar is famous for Uranium deposits and not petroleum, as both statements 1 and 2 are correct so correct option is (a).
13. Kharif crops are monsoon crops which are planted for autumn harvest that gets cultivated at the time of monsoon such as Cotton, groundnut and rice, so 1, 2 and 3 are correct. Statement 4 Wheat is incorrect as it is a Rabi crop, hence option (c) is correct.
14. Option (a) is incorrect as in African Savanna has tropical grassland with warm temperatures all round the year with highest rainfall. Option (b) is incorrect as in Central Asia Steppe, the climate is sub-humid and semi-arid with annual precipitation is 18 to 10 inches with snow ranges from 4 to 20 inches deep. Option
