19. “Each day is more or less the same, the morning is clear and bright with a sea breeze; as the sun climbs high in the sky, heat mounts up, dark clouds form, than rain comes with thunder and lightning. But rain is soon over.”
Which of the following regions is described in the above passage?
(a) Savanna
(b) Equitorial
(c) Monsoon
(d) Mediterrean

Answers

1. (a)	**2.** (d)	**3.** (c)	**4.** (a)	**5.** (b)
6. (a)	**7.** (b)	**8.** (b)	**9.** (d)	**10.** (c)
11. (d)	**12.** (b)	**13.** (c)	**14.** (d)	**15.** (d)
16. (c)	**17.** (b)	**18.** (a)	**19.** (b)	

Explanations

1. In South Atlantic and South Eastern Pacific regions located in tropical latitudes, the cyclone will not take place as in these regions the cold current flow which helps in lowering of sea temperature. To have a cyclone, the temperature of the sea should be a minimum of 27° Celsius. Option (b) is incorrect as the formation of ITCZ is not needed to have cyclones. Option (c) is incorrect as Coriolis force results as the weak force that is present in the region having 0 to 5° either North or South latitudes. Option (d) is invalid as land cuts moisture from the cyclone, so correct option is (a).
