There was no oxygen in the early atmosphere until simple organisms evolved the capability to carry out photosynthesis. Today, oxygen accounts for approximately 21% of the atmospheric gases and is essential to life.

10. Kodaikanal Lake is a manmade lake located in the Kodaikanal city in Dindigul district in Tamil Nadu, India. Sir Vere Henry Levinge, the then Collector of Madurai, was instrumental in creating the lake in 1863, amidst the Kodaikanal town which was developed by the British and early missionaries from USA. The lake is saidto be Kodaikanal's most popular geographic landmark and tourist attraction.
11. Barren Island is an island located in the Andaman Sea. It is the only confirmed active volcano in South Asia and the only active volcano along a chain of volcanoes from Sumatra to Myanmar. It is a part of the Indian Union Territory of Andaman and Nicobar Islands, and lies about 138 km (86 mi) northeast of the territory's capital, Port Blair.The first recorded eruption of the volcano dates back to 1787. Since then, the volcano has erupted more than ten times, with the most recent one being in 2017.
12. Most coral reefs are located in tropical shallow waters less than 50 meters deep, in the western regions of the Indian ocean, Pacific Ocean and Greater Caribbean. Global distribution of corals: Australia 17%, Indonesia-16%, Philippines-9%. So, Australia, Indonesia and Philippines together host more than one-third of world's corals. Thirty two out of thirty four recognised animal Phyla are found on coral reefs compared to only nine Phyla in tropical rainforests.
13. Map based - Refer atlas
14. Over the last 50 years, Aral Sea has shrunk by about 75% of its original size mainly because of water diversion for agricultural usages in surrounding areas. Also from a depth of 68 meters in the 1960s, today it stands at less than 10 meters. In Lake Baikal, water level has gone below the critical mark of 456m eleven times since 1962. Thus, while Aral Sea has dried up immensely, Lake Baikal shows more of a fluctuating regime and shrinkage is not comparable to that of Aral Sea.
