(d) 1,2,3

79. Which of the following are correct regarding Permanent jet streams?
    1. The Subtropical Jet stream exists all year in the Northern hemisphere.
    2. The polar front jet is produced by a temperature difference.
    3. In summer, its position shifts towards the poles and in winter towards the equator.

    Select the correct option:
    (a) 1,2 only
    (b) 2,3 only
    (c) 1,3 only
    (d) 1,2,3

80. Which of the following are correct?
    1. A cold air mass is associated with stable weather conditions.
    2. A warm air mass is associated with instability and atmospheric turbulence.

    Select the correct option:
    (a) 1 only
    (b) 2 only
    (c) Both 1 and 2
    (d) None of the above

81. Which of the following are correct?
    1. The temperature contrast influences the thickness of frontal zone in an inversely proportional manner.
    2. The frontal activity is invariably associated with cloudiness and precipitation.

    Select the correct option:
    (a) 1 only
    (b) 2 only
    (c) Both 1 and 2
    (d) None of the above

82. Which of the following are correct?
    1. Cumulonimbus clouds are formed along cold front but not along warm front.
    2. Warm front is a sloping frontal surface along which active movement of warm air over cold air takes place
