(b) 2,3 only
(c) 1,3 only
(d) 1,2,3

93. Which of the following is/are correct?
1. Central dense overcast is the cirrus cloud shield that results from the thunderstorms in the eyewall of a tropical cyclone and its rain bands.
2. The cyclones, which does not cross 20° N latitude generally, recurve and they are more destructive.
3. In general, the strongest winds in a cyclone are found on the right side of the storm.

Select the correct option:
(a) 1 only
(b) 2 only
(c) 3 only
(d) 1,2,3

94. Which of the following are correct regarding polar front theory?
1. A polar front is formed as a surface of discontinuity. Such conditions occur over subtropical high, sub-polar low pressure belts and along the tropopause.
2. Cumulus clouds develop along the cold front.
3. Precise movement of this weather system is controlled by the orientation of the polar jet stream in the upper troposphere.

Select the correct option:
(a) 1,2 only
(b) 2,3 only
(c) 1,3 only
(d) 1,2,3

95. Which of the following are incorrect regarding differences between tropical and temperate cyclones?
1. Tropical seas can be formed on seas only, whereas temperate cyclones can be formed on land only.
2. Tropical cyclones occur in late summers and all temperate cyclones occur in winter.
3. Tropical cyclones cover large area whereas temperate cyclones are limited to small area.

Select the correct option:
