that the trust in Prime Minister Modi and his party to deliver on all these issues remains intact, as is evident in both his high personal popularity and in the prediction that Modi and the BJP will return to power with a full majority for a third successive time. While Modi's impressive record on welfare programmes elicits endorsement, he needs to retain sharp focus on economic issues, growth and employment generation while ensuring law and order and communal harmony in the remaining months of his second term. Issues such as skill development among the youth need to be addressed urgently, as the MOTN reflects unhappiness among the young on the economic front. Encouraging small businesses and entrepreneurship is another imperative. The government cannot afford to lose sight of its targets in infrastructure and digitisation, especially of public services, in addition to tackling the employment scenario. Inflation is another beast that needs urgent taming, even while boosting agricultural production and productivity. Exports must be accorded priority as well, given that India has a sub-4 per cent share in the world services trade, 2.5 per cent of merchandise trade and an even smaller share of financial transactions.

When it comes to leadership, two prime ministers have stood out ideologically since Independence—Nehru for espousing and executing a vision of a Left-leaning socialist democratic India that laid the foundation for development and scientific progress. And Vajpayee, for vigorously pushing the right-wing agenda of free market and private entrepreneurship in the seven years that he ruled. Having laid the foundation in his first two terms, Modi is now on the cusp of becoming a statesman who enunciated and executed a lasting vision of a developed India that is both united and harmonious. He should not let anything come in the way of that journey. ■

Q. Which of these issues do you think will benefit the BJP most in the 2024 Lok Sabha election?

PM Modi's guarantee of making India No. 3 economy in the world	33
Construction of the Ram temple	17
Implementing the Uniform Civil Code	12
Scrapping of Article 370	8
None of these	20
DK/ CS	9

Modi's promise to make India the No. 3 economy finds the most resonance

Methodology

The INDIA TODAY Mood of the Nation (MOTN) poll was conducted by CVoter, a globally renowned name in the field of socio-economic research, between July 15, 2023, and August 14, 2023, interviewing 25,951 respondents in all Lok Sabha segments across all states. In addition to these samples, an additional 134,487 interviews from CVoter's regular tracker data between January 16, 2023, and August 14, 2023, were also analysed for the long-term trendline in calculating seat and vote share projections. Thus, the opinion of a total of 160,438 respondents was considered for this MOTN report. The margin of error is +/- 3 per cent at the macro level and +/- 5 per cent at micro level of reporting with 95 per cent confidence level.

From May 2009 onwards, the CVoter Tracker has been carried out each week, 52 waves in a calendar year, in 11 national languages, across all states and UTs in India, with a target sample size of 50,000 each quarter. The average response rate is 55 per cent. Starting January 1, 2019, CVoter has been carrying the tracker daily, using the rollover sample of seven days for tracker analysis.

All these polls are based on a random probability sample as used in the globally standardised methodology, carried out by trained researchers across all geographic and demographic segments. This survey is based on CATI interviews of adult respondents across all segments. Standard RDD is used to draw random numbers covering all frequency series allocated to all operators across all telecom circles in India.

CVoter ensures proper representative analysis by statistically weighing data to make it representative of the local population as per the latest Census figures. The data is weighted to the known census profile, including gender, age, education, income, religion, caste, urban/rural and vote recalls for the last Lok Sabha and Vidhan Sabha elections. For analytics, CVoter uses its proprietary algorithm to calculate the provincial and regional vote share based on the split-voter phenomenon.

CVoter follows the code of professional ethics and practices drafted by the World Association of Public Opinion Research and the official guidelines on opinion polling as instructed by the Press Council of India. ■
