# EVERY LINE OF DEFENCE : SECURED

The Solar Group of Industries comprising **Solar Industries India Limited** and **Economic Explosives Limited** has evolved from a single site manufacturing company into a globally recognized Industrial Explosives enterprise having manufacturing facilities across 4 continents and meeting the demands of over 75 countries. We are a BSE & NSE listed company with a market cap of over INR 39,000 Crores, with a Credit Rating of AA+ rating by Crisil.

Equipped with our extensive experience and expertise in the Industrial explosives segment, we entered into Defence Sector in the year 2010 and set up Economic Explosives Ltd (EEL), as a 100% subsidiary of Solar Industries India Ltd. EEL is guided by the principle of, "परिशीलन सिद्धत्व" that is, "In Pursuit of Perfection". It is our firm belief that our brave soldiers deserve nothing but the best. We therefore, constantly attempt to innovate and indigenise, focusing on the need to meet our Defence Forces' aspirations.

With a dedicated team of National and International experts, we have been relentlessly working for the Armed Forces to realize the visionary National Policies of the Hon'ble PM promoting Make in India and Make for World as part of "Atmanirbhar Bharat Abhiyan".

Solar has setup the world's largest state-of-the-art production plant at Nagpur to manufacture HMX, RDX and its compositions

to cater not only to the country's requirement but also to export to advanced countries like USA, France, Israel etc.

Some of our achievements in the recent past include the development of a world class 'Multi-Mode Hand Grenades', that were handed over by the Hon'ble Raksha Mantri. We subsequently supplied over 1 Million Grenades to the Indian Army. We have secured an order to supply the indigenously designed & developed, world class Loitering Munition - NAGASTRA-1, along with an order to supply PINAKA Rocket variants for domestic & exports. Our capabilities were well used for the indigenization of BrahMos Booster Motors and the production of PSOM-XL motors of VSSC, ISRO. We have contributed enormously in the production of 30 mm Ammunition and the development & production of Anti Submarine Rocket Fuze. The Life Assessment of our Ammunition facility is as per the high NATO standards.

We are in the process of developing products like Unmanned Aerial Systems, Advance Anti Tank Mines, Chaff & Flares & Multi Rocket launcher systems.
