KALYANI

Empowering India's Defence with Unmatched Precision and Power

The Advanced Towed Artillery Gun System (ATAGS), engineered by the Kalyani Group under the aegis of Defence Research Development Organization (DRDO) stands as a technological marvel, meticulously designed to deliver unmatched precision, power, and agility to India's artillery capabilities. With its 155mm/52 Caliber Gun System, cutting-edge features like the Automatic Ammunition Handling System, All Electrical Drives, and the ability to fire up to Zone 7 charge, ATAGS ensures India's armed forces are equipped with the best-in-class artillery solution. Its versatility, mobility, and quick deployment capabilities highlight its crucial role in determining the course of defence operations. With the indigenous range of defence product offerings, the Kalyani group is truly committed to Atmanirbhar Bharat and serve as a leading force in the field of artillery systems.
