SMART INFRASTRUCTURE

INTELLIGENT HIGHWAYS

HIGH-TECH GADGETS ARE BEING INTEGRATED WITH INDIA'S VAST HIGHWAY NETWORK FOR BETTER TRAFFIC MANAGEMENT AND TO KEEP MOTORISTS SAFE

It's transportation reimagined—efficient, sustainable and safer. The very infrastructure is becoming responsive, adaptive and alive. This is the future of mobility, and progress has begun.

On December 23, 2021, Union minister of road transport and highways Nitin Gadkari launched India's first Intelligent Transport System (ITS) on the Eastern Peripheral Expressway at Dasna in Uttar Pradesh, about 60 km from the national capital. The 135 km expressway now has a Highway Traffic Management System (HTMS) comprising smart equipment for video incident detection, overspeeding checks, pavement management, and more. All information collected goes to a central server in the control room, which, on the basis of these
