[82] The Mahananda Wildlife Sanctuary was started as a game sanctuary in 1955. In 1959, it was given the status of a sanctuary, mainly to protect the Indian bison and the Royal Bengal tiger.

[83] A loop line in railway parlance is a branch line which leaves the main line and rejoins it after a short distance. In other words, it is a less important line which leaves a main line and then rejoins it later, continuing in the same direction. A configuration, sometimes known as a balloon loop or horseshoe curve where trains entering it turn through a half circle and return to the start of the loop facing in the opposite direction from which they came, such as the Sutton Loop. The Darjeeling Himalayan Railway has several examples of these in addition to six full zigzags and three complete spirals. (UNESCO listing details: http://whc.unesco.org/en/list/944/ )
