Two bags of urea and one of DAP fertiliser free of cost for tenant farmers, free crop insurance and Rs 500 bonus over and above the MSP for paddy growers

seniors, whether MPs or legislators, will have to mandatorily contest assembly polls.

On his part, KCR brushes off the BJP as inconsequential in the state and claims it will have difficulty winning even one seat. In fact, he is as contemptuous of the Congress, calling it "a flop party" that "lacks the character of being a national party" and keeps shifting its ideology from state to state.

THE KCR GUARANTEE

Beyond the rhetoric, KCR himself is pitching the Telangana model of rapid and inclusive development. When he took charge in 2014, landlocked Telangana straddled a barren stretch of the Deccan plateau and relied on subsistence agriculture. Barring Hyderabad, the state had no other prosperous urban centre. Two major rivers—the Krishna and Godavari—skirted its periphery, but their low elevation levels meant that expensive lift irrigation was needed to exploit their waters for agriculture. KCR reels off macro numbers on how he has transformed India's youngest state. Among these is the CM's hard focus on boosting irrigation and power supply from the first term onwards as well as providing farmers with generous investment subsidies of Rs 10,000 per acre annually. Both these measures have seen the once unproductive state emerge as the rice bowl of the South. Paddy production has jumped from 6.9 million tonnes in 2014 to 26.3 million tonnes now. Per capita power consumption is 2,126 units, exceeding the national average of 1,255 units by 70 per cent. Industry, too, has grown rapidly on the back of innovative incentive schemes and fast-tracking of clearances for all manufacturing and services projects.

As a result, Telangana's Gross State Domestic Product (GSDP) has more than doubled from Rs 5 lakh crore in 2014-15 to over Rs 12.9 lakh crore in 2022-23. The state's nominal growth rate has averaged an impressive 12.7 per cent annually since its formation in 2014, 2.2 percentage
