

Maritime India Summit 2023, Prime Minister Narendra Modi launched the ambitious Maritime 'Amritkal' Vision 2047, aimed at unlocking investment worth Rs 80 lakh crore for the development of the maritime sector. In just three days, the summit secured investment commitments of more than Rs 10 lakh crore.

HARIT SAGAR

The maritime industry also has a critical role to play in mitigating climate change. The 'Harit Sagar' guidelines incorporate green initiatives in all major and non-major ports. The concept of the smart port is central to our vision with facilities such as e-gate, 2.0 robotic automation, drone-based inventory management and intelligent track booking. India's shipbuilding and repair sector is poised for monumental growth, and aims to be among the top five global players. Shipbuilding and repair clusters will emerge in strategic locations such as Mumbai, Kochi, Chennai, Gujarat, Goa, Visakhapatnam, Andaman and Nicobar and Odisha. Our commitments extend to ship recycling as well. India aspires to be the world leader in this domain. Autonomous vessel technology is a burgeoning industry, and we are proud to lead the way with projects like the delivery of autonomous electric barges to Norway by the Cochin Shipyard Ltd.

"India's major ports are seeing double digit annual growth. On the World Bank Logistic Performance Index for 2022, India ranked 22nd in the international shipment category. Our average container turnaround time–0.9 days–is better than that of the US, Germany and Canada"

"At the Global Maritime India Summit 2023, PM Modi launched the ambitious Maritime 'Amritkal' Vision 2047, aimed at unlocking investment worth Rs 80 lakh crore for the maritime sector. In just three days, the summit secured investment commitments worth over Rs 10 lakh crore"

"Waterways are coming up in all eight Northeast states under the Jalmarg Vikas Project. In Assam's Jogighopa, we are developing an international river port that will help Bhutan, Bangladesh and Nepal. The Indo-Bangladesh Protocol on Inland Water Transit and Trade is helping us connect with Myanmar too"

SARBANANDA SONOWAL
Union minister for Ports, Shipping and Waterways

REGIONAL WATERWAYS

Our focus on the development of a 5,000-km regional waterways grid primarily comprising four key waterways and certain international routes will help facilitate regional trade in South Asian and Southeast Asian countries. At the G20 summit, we announced a pathbreaking initiative, the India-Middle East-Europe Economic Corridor (IMEC). It will connect India to the Middle East nations through shipping lines. This will also encompass our focus on next generation mega ports. The development of Vadhvan port in Maharashtra and Tuna in Gujarat will be key to the success of IMEC.

MARITIME INDIA VISION 2030

The Maritime India Vision 2030 seeks to establish India as the premier cruise hub in the Asia-Pacific region. To achieve this goal, we'll have state-of-the-art cruise terminals, standardised procedures and e-visa facilities. The objective is to increase the annual number of cruise passengers in India to 5 million by 2047, from 472,000 now. By then, India will have 25 operational cruise terminals. Recently, MV *Ganga Vilas* created a world record by completing the 3,200-km-long voyage from Benares to Dibrugarh through Bangladesh. ■
