

A DIRTY REALITY
Wastewater being discharged into the Sabarmati in Ahmedabad

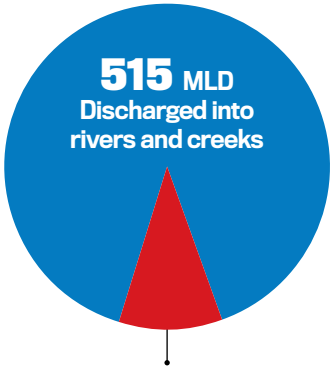

WHAT'S IN THE PIPELINE

A network of pipelines will discharge treated effluents from Gujarat's seven major industrial clusters into the Arabian Sea

WHERE THE EFFLUENTS GO

*Industries in Gujarat generate **575** million litres per day (MLD) of effluents*

₹8,321 CRORE
Total cost of the proposed pipelines

20-30%
Cost to be borne by participating industries

10 YEARS
Estimated time for the project's completion

9.4 km
Length of the existing offshore pipeline; it discharges effluents at a depth of 11 m
